Total Run Hours	3557
Cycles N1	18790
Cycles N2	2404

General Informations

Place of operation	Switzerland
Helicopter actual location	Switzerland, Gordola
Parked	Always in Hangar

Description

The H125 (previously named the AS350 B3e) outclasses all other single-engine helicopters for performance, versatility, low maintenance, and low acquisition costs, while excelling in high and hot and extreme environments. It is a member of Airbus' Ecu-reuil family, which has accumulated almost 36 million flight hours worldwide.

Our Helicopter is equipped for Aerial Work & pax missions, full swing, mirrors and floor window, equipment list available on request.

This Helicopter is a buyback from first and only Owner and was always maintained by Swiss Helicopter Maintenance which is a Official Service Center of Airbus Helicopters.

On the HB-ZNO we replaced the Starflex and other inspections.

Do not hesitate to contact us if you need further information and complete documentation of the aircraft.
